¹ Either the two-semester sequence of PHYS 1401Q-1402Q or the three-semester sequence of PHYS 1201Q-1202Q followed by PHYS 1230 or 1530 may be taken instead to satisfy this requirement. However, only eight credits of PHYS 1201-1202-1230/1530 can be used toward the required 126 credits for the Engineering degree.

² The courses from content areas one (Arts and Humanities) and two (Social Sciences) must be from four different departments. One course from either content area one (Arts and Humanities) or content area two (Social Sciences) may also be used to fulfill one of the requirements from content area four (Diversity and Multiculturalism). One course from content area four must be an international course.

³ STAT3345 can be replaced with MATH3160, though STAT3345 is recommended. Note that, between the two courses, only MATH3160 can be used for math minor.

⁴ The four restricted electives must be selected as follows: ECE 3211, ECE 3231, or ECE 3212; ECE 3221 or ECE 4201; ECE 4211 or ECE 4225; and ECE 4111 or ECE 4112. ECE 4211 can be substituted with ECE 5211 and ECE 4225 can be substituted with ECE 5225.

⁵ Prerequisites: Senior standing; ECE 3201; C+ or better in ECE 2001 and ECE 3101.

⁶ One additional W course must be taken, typically as one of the content area courses.

⁷ Twelve (12) credits professional requirements are chosen from 3000 or above Math, Science, and Engineering courses (excluding ENGR 3021, 3022, 3024, 3025 and independent study courses outside of ECE). **Two courses must be ECE courses** and only 3 credits can be from ECE 3096, ECE 4096, ECE 4079, ECE 4097, and ECE 4099. Any non-ECE professional requirement courses must be approved by the advisor and department UG director.

⁸ Choose two from ECE 3225, ECE 3411, ECE 3421, ECE 4079, ECE 4113, ECE 4114, ECE 4122, ECE 4132, ECE 4225, ECE 4242, ECE 4244, ECE 4401, ECE 4402, ECE 5242 and ECE 6244. Only one design lab may be ECE 4079.
